

ROCKET DAY!

One small step for man, one giant leap for Holy Rosary!

Our great day began when we first arrived in school. We were amazed to see the real, 'Starchaser' rocket on our playground.

Following the educational assembly, the Junior children were given the chance to make and launch their own miniature rockets. The Infant children were given a box of artefacts to explore, all about our theme, 'Flight'.

We all went out on the playground at the end of the day to see two (smaller!) real rockets launch over the school field.

It was a blast of a day!!
